

# Report for City of Ypsilanti Community Trees Survey

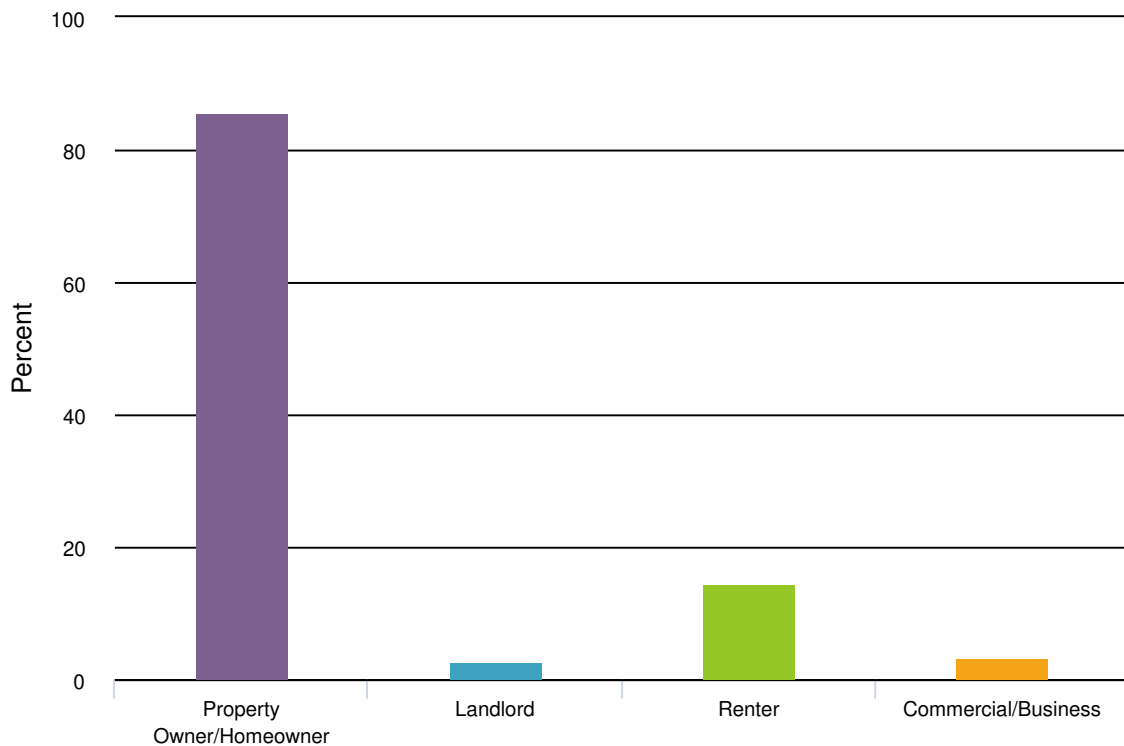

## Response Counts

---

Totals: 160

1. Pick the options that best describe your situation (may pick multiple if all within the City):

Value		Percent	Responses
Property Owner/Homeowner		85.7%	132
Landlord		2.6%	4
Renter		14.3%	22
Commercial/Business		3.2%	5

2. Community trees are ALL the trees in your city – on public land (parks, along streets) and private land (homes). How important to you are the services that trees provide?

	Very Important	Important	Unimportant	Very Unimportant	Responses
Provide shade and cool their surroundings Count Row %	123 82.0%	25 16.7%	1 0.7%	1 0.7%	150
Lower energy use and bills Count Row %	106 70.2%	42 27.8%	1 0.7%	2 1.3%	151
Protect water quality and reduce stormwater runoff and flooding Count Row %	126 85.1%	20 13.5%	0 0.0%	2 1.4%	148
Clean the air (remove pollutants, produce oxygen) Count Row %	134 88.7%	16 10.6%	0 0.0%	1 0.7%	151
Reduce soil loss from wind and stabilize hillsides and shorelines Count Row %	118 78.7%	29 19.3%	2 1.3%	1 0.7%	150
Increase property values Count Row %	80 53.3%	42 28.0%	18 12.0%	10 6.7%	150
Reduce noise pollution and/or provide privacy Count Row %	105 70.0%	36 24.0%	6 4.0%	3 2.0%	150

	Very Important	Important	Unimportant	Very Unimportant	Responses
Provide wildlife habitat Count Row %	127 84.7%	20 13.3%	2 1.3%	1 0.7%	150
Create safer neighborhoods and business districts Count Row %	89 58.9%	50 33.1%	10 6.6%	2 1.3%	151
Create relaxing and enjoyable outdoor areas Count Row %	120 80.0%	27 18.0%	2 1.3%	1 0.7%	150
Capture CO2, a greenhouse gas contributing to climate change Count Row %	129 86.0%	18 12.0%	2 1.3%	1 0.7%	150
Define the character of the City Count Row %	100 66.2%	37 24.5%	12 7.9%	2 1.3%	151
<b>Totals</b> Total Responses					151

### 3. OPTIONAL: Other services?

ResponseID	Response
16	use and preserve native trees
20	Kindling and fuel for backyard campfires.
27	One that I can think of
29	I also appreciate the aesthetic value. Beautiful trees to admire in parks or cemeteries, the "tunneling" effect that's street trees provide on a given street.
32	I also appreciate the aesthetic value - such as a beautiful tree in a park, cemetery or yard. Or the tunneling effect from mature street trees on both sides of the street ...
36	Slows down speeding cars
50	For kids to climb! :-)
59	Planning when doing planting so that future root development does not impinge sidewalks etc
62	Beautiful to look at-----
64	There needs to be public financial support for tree maintenance on residential areas. Leaving sole responsibility to the property owner discourages maintenance and replacement

## ResponseID Response

68	The city needs to replant trees that have died in the city owned parking strips between the road and the sidewalk.
74	That just about covers it! All of those are SO important and I believe there are only great reasons to plant more native trees around the city, especially along corridors such as MDOT's Washtenaw Avenue to encourage slower speeds and more pedestrian activity. More people want to walk in the shelter of trees - trees even add a sense of safety on higher speed corridors, knowing they're like fencing. Another great benefit - trees like maples, or pollinated fruit-bearing species, can encourage community microfarming and create part of a safety net for everyone in the community.
80	I love trees! God gave us trees to speak to us about his Awesome creation!!!
81	Seed gathering, climbing adventures for kids.
87	Thanks for adding recycling bins on downtown streets Griffin Schultz
95	Uplift my disposition when viewed out my window.
103	Old trees are living connections to past generations--to those who built the fine houses and commercial structures that we use. They are landmarks. They bring the sounds of nature--singing birds, chirping squirrels, rustling leaves--to the hard surfaces of the urban environment. They take our eyes skyward, reminding us that we are part of a vast diverse planet. Old trees start out as new trees. We need them all.
107	commentary other plants that go with the trees.
114	They connect us to the natural world.
117	Add beauty in every season
118	Offer beauty and connection to nature in an urban environment.
125	I WISH the trees in my area provided more help than hindrance. I live on a main city street and the leaves from the maple trees that line the street shed terribly and clog the storm drains, causing (my section of the street) severe flooding. I am, year around, raking out the storm drains. If I don't do it, it doesn't get done and the street is impassable. No exaggeration. I love the trees here but I wish they were evergreens! If the street cleaners would come more regularly it would help, too.
126	They are beautiful!

**ResponseID    Response**

132            Provide a sense of history and rootedness to the community — some trees in my neighborhood are older than my city. They provide a connection to the past: some of the trees in Riverside Park were planted by the Olmsted Brothers when the park was planned...

133            provide beauty

138            To provide shelter/homes for wild animals.

139            Provide natural, aesthetic and spiritual enlivenment and beauty

142            The best climbing structures for little children who need to move and grow.

147            Increase property value

156            Protect property against flood damage (very important)

168            Provide diversity of species

175            Ypsilanti, city of magnificent trees

4. How often are you affected by the following challenges related to community trees?

	Very Often	Often	Sometimes	Rarely	Responses
Cracked sidewalks and pavement Count Row %	30 20.3%	40 27.0%	50 33.8%	28 18.9%	148
Block light needed for lawn or garden Count Row %	8 5.4%	12 8.1%	56 37.8%	72 48.6%	148
Damage underground pipes and utilities Count Row %	6 4.1%	15 10.1%	53 35.8%	74 50.0%	148
Drop too many leaves and large fruit/seeds/nuts Count Row %	11 7.4%	26 17.6%	42 28.4%	69 46.6%	148
Disrupt power/impact aboveground powerlines Count Row %	8 5.4%	10 6.8%	72 48.6%	58 39.2%	148
Block ability to see road signs or pedestrians Count Row %	5 3.4%	17 11.5%	58 39.2%	68 45.9%	148
Create a safety hazard when damaged (falling tree limbs) Count Row %	7 4.8%	21 14.5%	58 40.0%	59 40.7%	145
<b>Totals</b> Total Responses					148

## 5. OPTIONAL: Other challenges?

ResponseID	Response
16	coat of periodic maintenance
19	The city replaced the ash tree on our easement with an invasive species of tree, callery pear. This is terrible for our environment. The city maintains a nursery which is neglected and may be full of invasive species of trees. The city requires homeowners to repair their sidewalks according to rigid specifications. In may areas if this is followed it will kill a tree the city has planted on the easement by cutting the roots.
27	-
55	City needs to do a better job at pruning dead limbs and replacing removed street trees
72	Trees are important- The Benefits out weigh anything else
80	All of those items can be eliminated by trimming trees.
81	I'm tall so low branches that hang over property barriers & lines hit me in the face.
82	people who don't know or ignore tree planting rules by putting too many one place or putting the wrong type of tree in the wrong place.
100	DTE's tree service has butchered most of the trees in my neighborhood so badly that they look ridiculous and it's embarrassing when people visit from out of town because the trees look so bad.
103	These challenges are not about too many trees but about the need for more resources to care for our trees.
107	poor maintenance because of the tree, (cutting down) and leaving it there makes a hazard.
114	I'd rather have the trees and live with any problems from them
118	Trees are frequently ruined by thoughtless and overly conservative pruning by utility companies. I hate when I see the Wright trucks drive up.
125	See aforementioned notes.
133	when planted one foot from house develops roots that, they tell me, threaten the basement
136	Cost of maintaining large mature trees on private property is expensive

**ResponseID    Response**

---

142            Stepping on a black walnut shell! Ouch! Also bagging allll those leaves

146            Black walnut toxicity

147            Falling on ground

156            tree rot - need trimming/removal (very important)

6. As a property owner or landlord, what support do you need to plant trees on your property?

	Very Useful	Useful	Might Be Useful	Not Useful	Responses
Free tree planting workshop Count Row %	24 18.5%	24 18.5%	66 50.8%	16 12.3%	130
Low or no cost equipment rental for planting trees Count Row %	36 27.5%	44 33.6%	34 26.0%	17 13.0%	131
Onsite help planting trees Count Row %	42 32.1%	42 32.1%	33 25.2%	14 10.7%	131
Assistance with tree selection Count Row %	54 41.2%	36 27.5%	30 22.9%	11 8.4%	131
Free or reduced cost trees Count Row %	84 64.1%	28 21.4%	15 11.5%	4 3.1%	131
Property owner should not be responsible for sidewalk damage caused by trees Count Row %	79 59.8%	24 18.2%	18 13.6%	11 8.3%	132
<b>Totals</b> Total Responses					132

7. As a property owner or landlord, what would be useful for maintaining trees on your property?

	Very Useful	Useful	Might Be Useful	Not Useful	Responses
Low cost or free equipment rental Count Row %	43 33.1%	44 33.8%	33 25.4%	10 7.7%	130
List of natural resource professionals (arborists, foresters, herbicide/pesticide contractors) Count Row %	63 48.5%	39 30.0%	24 18.5%	4 3.1%	130
Educational materials (pruning, invasive species, pests) Count Row %	65 50.0%	44 33.8%	18 13.8%	3 2.3%	130
Cost-share or grants (invasive species, pest control) Count Row %	61 46.9%	41 31.5%	24 18.5%	4 3.1%	130
Workshops (pruning, invasive species, pest identification) Count Row %	46 35.7%	43 33.3%	40 31.0%	0 0.0%	129
<b>Totals</b> Total Responses					130

## 8. OPTIONAL: Other ideas or specific requests for tools (tree planter, no-till drill, hand tools)?

ResponseID	Response
27	X
31	Assistance in tree selection and placement most helpful -- similar to the county drain commission's rain garden consultations.
32	Also would need help in cases of tree removal, including invasive trees. That would include TA and equipment
74	I would love city assistance in caring for the trees on my property! They add value (measurable or immeasurable), and I care about keeping them in good health. I do have a dead tree in my back yard and it has been next to impossible to schedule a professional to remove it. City assistance would be great so that I can avoid any damage that may be caused by future falling branches!
82	tree landscape planner assistance
97	As long as pest & invasive control is organic and natural. Let's NOT cause more issues with chemicals that harm us and the environment
100	We contacted the city years ago about replacing lost trees on our tree lawn and got no response. If the city won't replace the trees then homeowners should be able to do it however they want
103	Our zero-lot line building does not allow us to have trees of our own, so my answers are not really relevant here. We would participate with tree-planting projects in public spaces (parking lots, Riverside Park) or with other nearby property owners.
114	Nice ideas here, thanks!
117	Tool borrowing bank that homeowners can use to trim dead limbs on trees that sit on the city owned margin of peoples properties. I think home owners would like to help keep the trees trimmed but might be afraid to since it's on city property. I have such a tree that's shedding twigs, small and medium sized limbs... Actually half the tree is dead but my hand saw on a pole isn't long enough and estimates to get it trimmed run 500-800 bucks.
118	What ground cover can I plant under trees to avoid a mud yard? What are alternatives to raking and bagging my leaves in fall?
132	City contracts with arborists that would provide residents with reduced rates.

**ResponseID    Response**

---

136            Large wood chippers (preferably with delivery and take away!), chainsaws, anything that helps with the labor of planting.

140            Pest barriers for seedlings. Also, watering bags.

147            We lost 30 trees in 5 years

156            professional advice regarding tree planting; free professional advice (paid by grant)

174            City must have tree trimming and removal service. Need the trimming and removal done for us. Too old to do by myself.

## 9. How important is access to trees? Would you like to have trees...

	Very Important	Important	Unimportant	Very Unimportant	Responses
On the property where I live Count Row %	105 71.9%	32 21.9%	7 4.8%	2 1.4%	146
Along the streets where I walk and bike Count Row %	113 76.9%	30 20.4%	4 2.7%	0 0.0%	147
Along streets where I drive Count Row %	85 63.4%	45 33.6%	4 3.0%	0 0.0%	134
In a park within walking distance Count Row %	120 81.6%	25 17.0%	2 1.4%	0 0.0%	147
In a park within driving distance Count Row %	104 71.2%	39 26.7%	3 2.1%	0 0.0%	146
In business districts, where I dine and shop Count Row %	76 52.4%	58 40.0%	10 6.9%	1 0.7%	145
<b>Totals</b> Total Responses					147

## 10. OPTIONAL: Anywhere else?

### ResponseID Response

19	schools
21	Everywhere! No more new buildings sucking up land. Get rid of strip malls and concrete jungles and plant trees everywhere! :)
31	Huron river edges, regardless of whether adjacent property is park or private. Institutional properties like EMU and St. Joe's campuses, and larger apartment or commercial properties -- need trees to break up large masses of building, parking lot, etc.
32	Would love trees in medians for traffic calming as well.
35	In parking lots.
74	Put trees EVERYWHERE! In the past couple years, the city removed a LOT of trees, brush, saplings, and groundcover from the border-to-border trail leaving it bare, muddy, and scarred.
75	I think it would be nice to have in areas where there are empty lots. Let's rezone some of this dead space and turn into green spaces for people and wildlife.
97	More around industrial areas - to help clean the air.
101	On non-park public properties, like schools, libraries, etc
103	Are rooftop trees an option?
105	Everywhere?
114	The more trees, the better for the neighborhood and planet!
117	Over the past 3 years I've planted 3 new trees in my front yard all are now 7-11 feet tall. The next generation that lives here will be able to enjoy them.
118	Along the border to border trail.
132	Focus on replacing older Norway maples with native trees and nectar bearing trees. The project along Cross Street adding little leaf lindens, bald cypress, Turkish hazelnuts, and summer lilacs was a GREAT one!
133	along highways instead of cutting down trees within 15 feet of the road because drivers might hit them. I've seen small towns denuded by this practice.

**ResponseID    Response**

---

136            Along Washtenaw in the commercial districts between Hewitt and golfside. Decent sidewalks would be great too. I guess I want the whole enchilada.

140            Large scale industrial/business locations - as possible to "naturalize" an unnatural development. Enhances visual of potentially ugly space.

142            At playgrounds where I bring my son to play. At libraries. At schools, to make the children & teens feel more beautiful and special and welcomed.

156            to reduce flooding and property damage

11. Do you know how to report a public tree that may pose a safety risk?

Value	Percent	Responses
Yes, go to <a href="http://cityofypsilanti.com/YpsiConnect">cityofypsilanti.com/YpsiConnect</a> or call 734-483-1421	30.3%	44
No, but now I do!	69.7%	101

Totals: 145

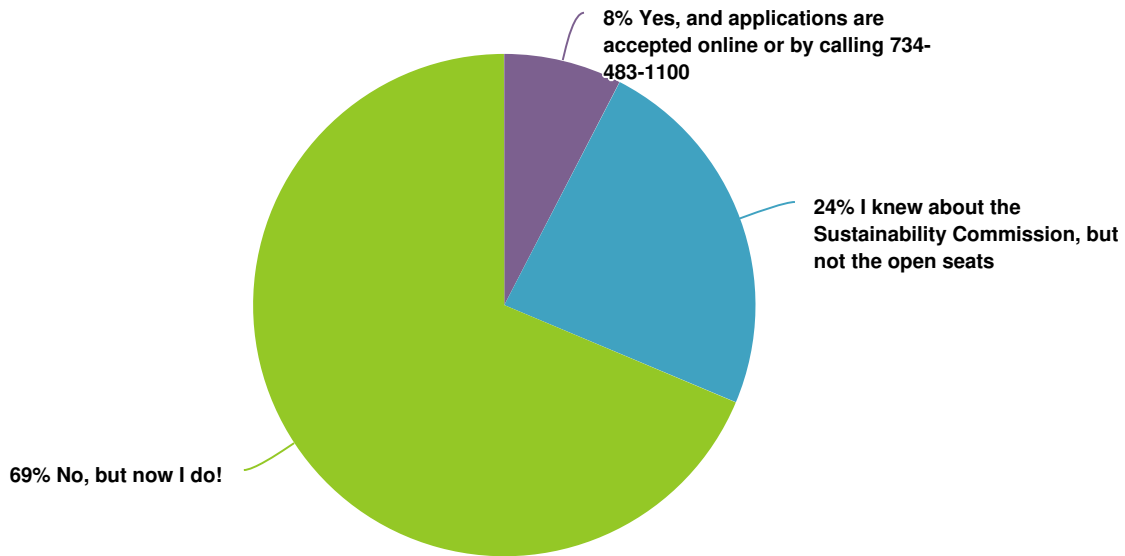

12. Did you know that a Street Tree Permit (no fee) is needed to plant a tree along the street?

Value	Percent	Responses
Yes, and I go to <a href="http://cityofypsilanti.com/trees">cityofypsilanti.com/trees</a> or call 734-483-1421	18.6%	27
No, but now I do!	81.4%	118

Totals: 145

13. Did you know that the City of Ypsilanti's Sustainability Commission, whose mission is "to create a model of sustainability through efforts to advocate, educate and promote the social, economic and environmental health of the community now and into the future", has vacant seats including two youth seats?

Value	Percent	Responses
Yes, and applications are accepted online or by calling 734-483-1100	7.6%	9
I knew about the Sustainability Commission, but not the open seats	23.7%	28
No, but now I do!	68.6%	81

Totals: 118

14. The City’s trees are valued at about \$12.8 million. To protect them, what can you contribute?

	Willing	Might Be Willing	Not Willing	Not Applicable To Me	Responses
Water, weed, and mulch public trees in front of my house Count Row %	100 69.4%	30 20.8%	5 3.5%	9 6.3%	144
Help coordinate or attend a tree planting event (neighborhood, place of worship, school) Count Row %	40 27.8%	71 49.3%	29 20.1%	4 2.8%	144
Support local policy changes to increase and maintain trees Count Row %	99 69.7%	36 25.4%	4 2.8%	3 2.1%	142
Volunteer to plant and maintain trees on public property Count Row %	46 31.9%	64 44.4%	29 20.1%	5 3.5%	144
Support the City dedicating more funds to trees Count Row %	88 61.1%	45 31.3%	7 4.9%	4 2.8%	144
Learn how local laws impact trees Count Row %	88 61.5%	44 30.8%	7 4.9%	4 2.8%	143
Learn how to become involved in local government, such as the Sustainability Commission Count Row %	24 19.5%	71 57.7%	23 18.7%	5 4.1%	123
<b>Totals</b> Total Responses					144

## 15. OPTIONAL: Other ways to support trees?

### ResponseID Response

15	Learn to identify tree diseases and infestations and where to report them (public or private) so they can be addressed.
16	I note that the city has a sign for a nursery just east of Depot Town. It is used?
19	The city should follow the sustainability commissions recommendations instead of doing the opposite.
27	My neighbor Mary Mullalond is already reaching out to people in my circle to pick a tree for our areas (between sidewalk and street) for planting this spring. She has been in touch with the city.
32	I would also support funding to DPS for increased maintenance, trimming and planting of more street and parks trees.
87	I don't know the current budget
101	Spread word of mouth to friends and neighbors about the tree services and workshops the city provides
107	Enact laws like ann arbor, where if you cut down a tree, the city and property owner makes a detailed plan to plant new ones. Landlords can cut down trees and no one knows about it until after the fact.
133	give up my lawn to natural plants, especially those native to southeast Michigan
147	No mulch - back up in sewer flooded basement!
150	I rent - some don't apply

16. Would you like WCCD to contact you with information on the items you selected?

Value	Percent	Responses
Yes, by email	42.5%	62
No thanks, I can check your website (www.washtenawcd.org) for updates and sign-up for your monthly e-Newsletter	57.5%	84

Totals: 146

17. Any additional suggestions or comments about trees in the City of Ypsilanti?

**ResponseID    Response**

15                    My street was rebuilt and widened several years ago. Several mature trees had to be removed, but some that were preserved were badly damaged when the elevation of the ground around them changed. They've been sickly and dropping branches ever since. I've reported a few for removal. Would be nice if greater care had been taken in the first place, or if they'd simply been removed.

19                    The city is currently in negotiations with a developer on one of the last remaining high biodiversity wooded areas. I think they should follow the best practices of the water resources commission on retention basins, and should do more protect the biodiversity of this area instead of just letting a few trees stand around the edges.

21                    Thank you for asking these questions and doing this work. More trees, please!

31                    City streets need more street trees specifically, especially in lower-income and higher-rental occupancy neighborhoods. (The city has a forestry inventory and plan identifying gaps, are we using it?)

32                    We have a decent urban forest and would love to see more resources to care for public trees. Would also like additional outreach and support for low-income parts of the city and student areas to make sure we here from everyone in the community.

35                    Need more trees along our roadways

## ResponseID Response

50	Thanks for supporting trees in our community!
55	Quit planting Bradford pear cultivars. They are soft wooded and short lived and their seed are carried into natural areas where they take over native species
64	Resource need to be targeted to underprivileged areas. It's also not enough to simply plant trees in these areas (though that is important). It's also vital that residents be provided with resources to ensure the trees are maintained, otherwise they'll become a liability to residents least able to cope
66	I would be very interested in efforts to plant trees with edible fruits/nuts that would be freely available to everyone in our community. I would also be very interested in efforts to plant blight-free American Chestnuts in the City of Ypsilanti, when it becomes possible to do so.
75	Some of the trees planted along the street are invasive species (Norway Maple). It would be nice if we could replace some of these with native or less harmful species.
77	Money should not only be allocated to plant trees, but also to remove invasive trees like the Bradford Pear.
82	thanks for survey
87	They look good, I like the circular metal grates around them downtown
97	Go Trees!
100	Respond to tree permit requests
103	It is wonderful to see the resources and support already invested in trees in Ypsilanti. Thank you for this survey and for all your work!
105	Does DTE have to hack them like that?
107	A lot of the information listed above, limit how much I can complain if there are two trees problems I can only report one and the city has not honored my requests because of the number of complaints I notice. The other one is about permits, I did not know about it but I wish there was an easier way to remind me.
109	Happy to see this sort of assessment being conducted. Thanks.
111	I wish they hadn't planted silver maples and other fast growing trees so close to the sidewalk, in fact, please take them off of my property and I will plant something else that doesn't crack and destroy it.

## ResponseID Response

114 We love that Ypsi is so supportive of our neighborhood trees. Thanks!

117 I've been using Click Fix to report tree problems and it get results.

118 Trees would go a long way to beautify the City.

125 Street cleaning is a must!

132 Some attention to removing Siberian elms along the Huron in Riverside Park would be appreciated.

133 I like them wherever I find them and hate to hear them being cut down. We need them in all neighborhoods.

135 Thanks for running survey; trees are extremely important; I think many homeowners are willing to commit some time and resources to helping - at least on my street.

142 Thank you for tending to the trees! They are so precious and add so much to our community.

147 No mulch - trees do not get water - back up in basement

150 Do not spray herbicide on wild berries. I like to pick them for pies.

155 I love trees and have planted many on my property.

156 Would love to see replacement for trees damaged/killed by diseases

170 Thanks!

174 Reported a tree that poses a safety risk several years ago with no response
